NOTICE

For all billing, the University Business Office requires a FEDERAL EMPLOYER'S IDENTIFICATION NUMBER (F.E.I.N.) for schools and companies, or a SOCIAL SECURITY NUMBER for individuals. The University has established these as personalized customer numbers for accounting purposes. Your F.E.I.N. may be obtained from the person who prepares your payroll tax for the Federal government. It will be necessary to include this information on all orders to be billed.

GENERAL INFORMATION

Instructional materials in Agriculture listed in this catalog have been developed primarily for use in high schools, junior and community colleges, and universities.

Vocational Agriculture Service, a division of the College of Agriculture, University of Illinois at Urbana-Champaign, operates on a nonprofit basis. Prices for materials are calculated to cover development and production costs. Because of tax support from the state, Illinois orders are billed at a 20% discount under catalog prices.

Ordering Information

Orders are accepted without payment in advance from schools and other recognized institutions when accompanied by official purchase orders and F.E.I.N. or Social Security numbers as previously stated. Actual shipping charges are added to orders when billed.

Cash Orders

If payment is sent with an order, please include the following additional amounts for shipping and handling:

For orders under \$25.00	add \$2.00
For orders from \$25.00 to \$75.00	add 7%
For orders over \$75.00	add 6%

Checks for prepaid orders should be made payable to the UNIVERSITY OF ILLINOIS, but sent to Vocational Agriculture Service, 1401 S. Maryland Drive, Urbana, Illinois 61801.

Telephone Orders

Orders may be placed by calling Vocational Agriculture Service. Please have an authorized purchase order number and Federal Employer's Identification or Social Security Number before placing your order by telephone. Call 217/333-3871.

Payment

Orders will be invoiced shortly after materials are shipped. Shipping charges are added to invoice. Payment is due upon receipt of invoice. Checks must be drawn upon a U.S. bank and payable in U.S. currency. Prices are subject to change without notice. University policy states that accounts that are unpaid after 30 days will be charged a 1% or \$1.00 minimum monthly charge on the amount that is 30 days or more past due. Charges over one year old will be sent to a collection agency by the Accounts Receivable Section of the Accounting Division.

Returns for Credit

Written authorization for return of materials to Vocational Agriculture Service must be obtained prior to return. Credit will be issued ONLY if material is listed in the current catalog, is unmarked and in resalable condition. There will be a 20% restocking fee for all returns. Material must be returned prepaid within 90 days of the date of purchase. The invoice number on which the materials were billed must be included with the return.

Items returned to Vocational Agriculture Service not in resalable condition or not authorized for return will be returned to purchaser without credit.

Foreign Orders

A statement of total cost of material ordered and shipping charges will be submitted before shipment. Orders must be prepaid, including surface or airmail charges. Payment must be made either in the form of U.S. currency money order, or by check drawn on a U.S. bank in U.S. currency.

DESCRIPTION OF INSTRUCTIONAL MATERIALS

Subject-Matter Units

Units cover a particular subject and are designed for use as a text by every student in the class. They are 8 1/2" by 11" in size and punched for three-ring notebook.

Slidefilms

Slidefilms are single-frame, 35mm color films used on a standard filmstrip projector. Some text material is generally shown on each frame so that a separate script may be unnecessary. However, most slidefilms are accompanied by a study guide or script that is included in the slidefilm price. Cassette tapes narrating study guide text are listed when available for the slidefilms.

Slide Sets

Standard 2" x 2" color slides usually include material identical to the slidefilm of the same title and number. Slide sets may have an accompanying study guide which is included in the slide set price. Cassette tapes narrating study guide text are listed for slide sets when available.

Transparencies

These are 8 1/2" x 11" instructional illustrations printed on clear plastic for overhead projection. Each transparency is accompanied either by a printed paper copy, usually with some text on the back, or by a study guide with text. Some transparencies have cassette tapes for narration. Each set is packaged in a manila pocket folder with the title of the set stamped on the tab.

Study Guides

Study guides are 8 1/2" x 11" printed booklets that may accompany slidefilms, slide sets, or transparency sets of the same title and number. They include reduced-size black and white picture frames adjacent to the narration or script for the frame. Study guides are used for narration, to review the presentation, and for independent study. They may be purchased separately, but are included in the price of slidefilms, slide sets, and transparency sets and are listed with accompanying visuals when available.

Cassette Tapes

Cassette tapes fit a standard cassette tape player and are used to narrate slidefilms, slide sets, or transparency sets of the same title and number. The information in the cassette is the same as contained in the study guide or script.

Color Photo Sheets and Booklets

Color photo sheets, 8 1/2" x 11", consist of detailed close-up pictures on one side and concise descriptions on the reverse side. Weed Plants, Crop Plants, Horticulture Plant Diseases, and Field Crop Plant Diseases are booklets with photo sheets, 8 1/2" x 11", spiral bound.

Diseases of Soybeans and Corn, Insect Pest Identification of Corn, Soybeans, and Alfalfa, and Vegetative Identification of Common Row-Crop Weeds are pocket sized spiral-bound booklets. These informative color booklets are useful for identification purposes in the classroom or in the field.

Color Flash Cards

Flash cards have color photographs on one side and identification and a brief description on the reverse side. Cards may be used for individual or classroom instruction.

Oxyacetylene Series

This series consists of 12 slidefilms, or 12 slide sets on oxyacetylene processes. Individual slidefilms or slide sets may be purchased with or without cassettes. By combining the 12 tape recordings on 6 cassettes, a complete set is offered at considerable savings. The slidefilm set only is packaged in an attractive storage box.

GOOD SEMEN

ANIMAL SCIENCES

Slidefilms, Slide Sets, Study Guides, Cassette Tapes

Breeds of Dairy Cattle

This 38-frame slide set (or slidefilm) illustrates and discusses six breeds of dairy cattle: Ayrshire, Brown Swiss, Guernsey, Holstein, Jersey, and Milking Shorthorn.

F210	Slidefilm, 38 fr.	\$ 7.55
S210	Slide Set, 38 fr.	12.55

Holstein Judging Classes

This 32-frame slide set (or slidefilm) includes two rings of mature Holstein cows. Two views of each animal are presented as well as group pictures along with placings and official reasons.

F211-1.1	Slidefilm, 32 fr.	\$ 6.35
S211-1.1	Slide Set, 32 fr.	10.55

Guernsey Judging Classes

This 32-frame slide set (or slidefilm) includes two rings of Guernsey cows. Two views of each animal are presented as well as group pictures along with placings and official reasons.

F211-2.1	Slidefilm, 32 fr.	\$ 6.35
S211-2.1	Slide Set, 32 fr.	10.55

Selecting Dairy Cattle

This 61-frame slide set (or slidefilm) illustrates in detail and discusses how to select dairy cows and heifers based on type, production records, and production pedigrees. It also illustrates and describes desirable breed characteristics for Ayrshire, Brown Swiss, Guernsey, Holstein, and Jersey Breeds.

F207a	Slidefilm, 61 fr.	\$ 12.10
S207a	Slide Set, 61 fr.	20.15

The Cow's Udder and How It Functions

This 48-frame slidefilm illustrates and explains the functions of the various parts of the cow's udder. It also explains how the cow "lets down" her milk and what happens to milk "let down" when a cow is frightened or injured.

F208a	Slidefilm, 48 fr.	\$ 9.50
-------	-------------------	---------

Clipping and Trimming Dairy Cattle

This 34-frame slidefilm illustrates and discusses the step-by-step procedure involved in clipping dairy cattle.

F209	Slidefilm, 34 fr.	\$ 6.70
------	-------------------	---------

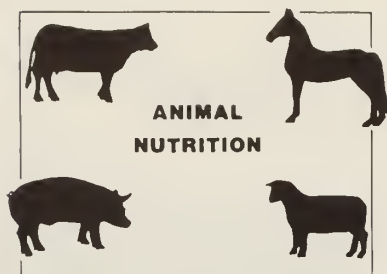

FEEDS AND FEEDING

Subject-Matter Units, Test Questions & Teacher's Keys

U1013a	General Facts on Livestock Feeding, 8p	\$.45
Q1013a	Test Questions, pkg. of 10	1.10
K1013a	Teacher's Key for Q1013a	.55
U1063	Feed Additives and Hormone Implants in Animal Agriculture, 32p	1.80

Additional study guides are available at a cost of \$1.40 each.

ANIMAL SCIENCES

Transparencies, Study Guides, Cassette Tapes

Animal Nutrition Transparencies

This is a set of 72 transparencies with study guide covering ruminant and nonruminant digestive systems, the "feed groups," nutrient requirements of livestock, how to formulate a ration, sample rations for beef, swine, sheep, and horses, and other topics. This is one of the most complete sets of transparencies available on animal nutrition.

T131	Transparency Set, 72 fr., w/study guide	\$ 29.35

Slidefilms, Slide Sets, Study Guides, Cassette Tapes

Good Horsemanship

This 43-frame slide set (or slidefilm) illustrates and discusses various points to check before mounting the horse, how to mount properly, best positions for the hands and feet, and the proper rider position in the saddle for various gaits.

F150	Slidefilm, 43 fr.	\$ 8.55
S150	Slide Set, 43 fr.	14.20

Preparing the Horse for Riding

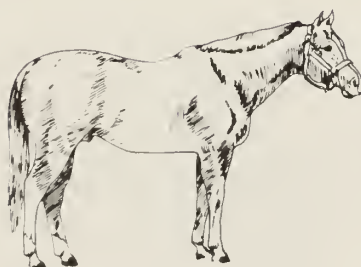

This 52-frame slide set (or slidefilm) illustrates and discusses proper clipping, grooming, checking the feet and shoes, and checking and adjusting riding equipment.

F151	Slidefilm, 52 fr.	\$ 10.30
S151	Slide Set, 52 fr.	17.15

Horse Feeding and Nutrition

This 79-frame slide set (or slidefilm) with study guide illustrates many of the common factors that should be considered in good horse nutrition. Techniques for developing a proper horse feeding program are stressed that are based on common sense applications of nutritional needs. Topics discussed include the nonruminant digestive system, nutrient requirements and their sources, specific feeding techniques, suggested life stage feed rations, and the various grains and hays used as horse feed. Techniques for monitoring potential health problems and using protein supplements are also included.

F152	Slidefilm, 79 fr., w/study guide*	\$ 17.05
S152	Slide Set, 79 fr., w/study guide*	27.45

ANIMAL SCIENCES

Transparencies, Study Guides, Cassette Tapes

Horse Transparencies

This is a set of 40 overhead transparencies printed in colored ink on clear plastic. It includes many different aspects of caring for horses. Also included is a white paper copy of each frame with text on the back.

T150 Transparency Set, 40 fr. \$ 17.05

MEATS

Slidefilms, Slide Sets, Study Guides, Cassette Tapes

Complete Series on Meat Identification

These slidefilms or slide sets identify and discuss wholesale cuts for beef, pork and lamb, and how to determine whether a given piece of meat is beef, pork, veal or lamb. They also identify and discuss the retail cuts for beef, pork and lamb.

SLIDEFILMS

F180-1	Identification of Retail Meat Cuts, 110 fr.	\$ 21.70
F181a	Identification of Kinds of Meat, 33 fr.	6.55
F182a	Identification of Pork Cuts, 81 fr.	16.05

Calibration of Pesticide Application Equipment Series

These slidefilms are also available as slide sets and each is accompanied by a study guide. Also available is a reference manual, a booklet of sample problems, an instructor's key, and a cassette tape of each study guide. Topics stressed are determining amounts of pesticides to apply per acre, selection of nozzles and tip size, calibration, measuring ground speed, determining the amount of pesticide to add to the spray tank, and safety.

Basic Principles of Hydraulics

These 59 transparencies and an information packed 16-page study guide provide an excellent teaching tool. Emphasis is on hydraulic principles, basic formulas, pistons, pumps, valves, and design functions of hydraulic systems. This teaching aid is especially valuable in providing the student with an understanding of the basic principles of hydraulics.

Small Engine Parts and Functions--FUEL AIR INDUCTION

These 80 frames, available either as a slide set or slidefilm, are accompanied by a 16-page study guide. The parts of the small engine which are used in the process of fuel-air induction are pictured and their function in the process is explained. The last section of the program consists of pictures of the parts for identification by the students with an answer key provided in the final frames. This material should be especially useful for introducing beginning students to small engine fuel-air induction.

Flash Cards

Nursery/Landscape Plant Identification

This set of 116 cards features glossy color photographs of 111 plants common to the nursery and landscape trades in the United States. On each card, an original line drawing illustrates branch, leaf, flower, and fruit characteristics so important in choosing the right plant for horticultural uses. Plants are identified and described on the back of each card. Practical cultural and landscape use information has been compiled from numerous references and authorities.

Conservation Systems Workshop Material

These materials will help teach the fundamentals of conservation planning. Users will learn how to use aerial photos and soils maps to identify highly erodible fields. They also will learn how to estimate water and wind erosion, identify resource problems, and select economical solutions. Includes information on leaving enough residue to reduce soil erosion and comply with state and federal erosion guidelines.

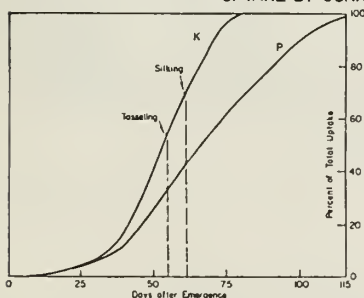

SLIDEFILMS -- each includes study guide and cassette tape

Plant Diseases: Field Crop Plants

An 8 1/2" x 11" spiral bound booklet with 26 photo identification sheets, each of which has one side filled with up to 25 detailed color photos and the other side with descriptions of the illustrated disorders. Major categories of disorders include diseases, herbicide injuries, and insect pests. A useful reference for agronomists.

MX799.91 Spiral bound booklet \$ 11.25

Diseases and Pests Notebook

A 3-ring notebook organized with tab dividers for storing diseases and pests color photo sheets. There is additional room for other information in each section. Major divisions of the notebook include diseases, herbicide injury, pests, and weeds of agronomic and horticultural crops.

X800 Notebook, with tabbed dividers \$ 12.00

Diseases of Soybeans and Corn

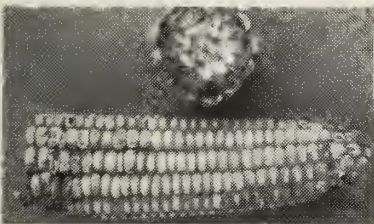

This 3" x 5 1/2" booklet (spiral bound) is a guide to help identify diseases of soybeans and corn quickly and accurately. It assists in early, in-the-field identification when control measures are generally more effective. Over 50 different diseases are illustrated with color photos.

X830 Spiral bound pocketbook \$ 6.00

Vegetative Identification of Common Row Crop Weeds

In pocket booklet size (3" x 5 1/2", spiral bound), this guide features 38 of the most common weeds in row crops in the Midwest, including perennials, annual grasses, and annual broadleaves. Key vegetative parts of each species are presented along with a color photo. A convenient aid to being a knowledgeable row crop manager.

X840 Spiral bound pocketbook \$ 5.50

Weed Plants

Crop Plants

Each 8 1/2" x 11" booklet has 40 sheets with clear color photographs that help identify plants quickly and accurately. Each weed or crop plant is shown in 4 stages--seed, seedling, mature plant, and flower.

X850	Weed Plants booklet, 82 p	\$ 15.00
X860	Crop Plants booklet, 82 p	15.00

Insect Pest Identification of Corn, Soybeans, and Alfalfa

A handy 3" x 5" pocket booklet with 25 color photographs of insect pests. Describes damage, scouting procedures, and guidelines for control.

X870	Spiral bound pocketbook, 52 p	\$ 4.50
------	-------------------------------	---------

Field Crop Scouting Manual

Designed to aid in identification and evaluation of common pest problems in the field. Contains basic scouting procedures for insects, diseases, and weeds. Describes nutrient deficiencies, herbicide injury, and other agronomic crop problems (includes 19 color sheets).

Revision available in early 1989. Description and price will be published in *Vo-Ag News & Notes*.

X880	Spiral bound book, 136 p	\$ 11.00
------	--------------------------	----------

Judging Booklet

Crop Judging

A manual designed to aid in preparing students to judge crops. For wheat, oats, soybeans, corn, hay and corn silage, listings of quality factors ranked in order of importance are presented. Sample completed scorecards are included--these match sample judge's reasons and placing. Illustrations include crop seed photographs and diagrams.

J790	Manual	\$ 3.85
------	--------	---------

Additional Judging Materials on page 46.

Crop Science: A Laboratory Manual

Provides a well-balanced blend of fundamental principles of plant science and practical material relating to field crop production. Each chapter includes learning objectives, text, and laboratory exercises. Hands-on exercises develop the skills and confidence essential to preparing students for careers in the agronomic sciences. Written for the introductory level college class. An excellent resource for high school agriculture instructors.

RELEASES PROGRAMS

Agriculture Releases

Agriculture Releases are a series of packets assembled periodically, October through April, containing miscellaneous new or revised agricultural materials. Subscribers to this service automatically receive a copy of each new circular, most new bulletins, various newsletters and releases from departments of the University of Illinois College of Agriculture; proceedings of conferences, seminars, and field days; each new printed publication from VAS; and other items of interest. Occasionally materials are obtained from the USDA and other state universities. Many of these items are provided free to VAS Releases subscribers, while others are distributed at cost.

Releases charges are accumulated and billed at the end of the school year. Maximum charge for this service for 1989-90 is \$80.00 for Illinois subscribers, and \$95.00 for out-of-state subscribers (plus shipping). If the total charge is less than the maximum, the lesser amount (plus shipping) will be billed. Also included with each

packet are a reference sheet and a set of 3" x 5" cards indexed according to the categories used in the VAS filing system. (The filing system is sent free to new subscribers.)

Horticulture Releases

Horticulture Releases include current printed materials of interest to Horticulture teachers. Each Releases packet contains recent University of Illinois Extension publications, new and revised Vocational Agriculture Service publications, plus additional relevant information. Free items are often included; most items are sent at cost. Releases packets are issued periodically from October through April.

Releases charges are accumulated and billed at the end of the school year. Maximum charge for this service for 1989-90 is \$50.00 for Illinois subscribers, and \$60.00 for out-of-state subscribers (plus shipping). If the total charge is less than the maximum, the lesser amount (plus shipping) will be billed.

ADVANCE ORDER SERVICE

Advance Order Program

Those who subscribe to the **Advance Order Program** receive an additional 10% discount under the regular price paid for new materials. All new and revised subject-matter units, slidefilms, slide sets, study guides, and transparencies released by Vocational Agriculture Service during the school year are distributed in this program.

The program is divided into two separate categories: Agriculture/Agribusiness, and Horticulture. Four types of materials are offered under each category--slidefilms, slide sets, transparencies, and sets of subject-matter units.

Slidefilms/Slide Sets – The advance order for slidefilms/slide sets includes one print of each slidefilm or slide set released during the school year and a study guide or script if one is produced. For Illinois residents, the guaranteed maximum cost for 1989-90 Agriculture/Agribusiness slidefilms is \$80.00; for slide sets the guaranteed maximum is \$130.00. For out-of-state residents, the guaranteed maximum cost is \$95.00 for slidefilms and \$165.00 for slide sets.

For Illinois residents, the guaranteed maximum cost for 1989-90 Horticulture slidefilms is \$60.00; for slide sets the guaranteed maximum is \$100.00. For out-of-state residents, the guaranteed maximum cost is \$70.00 for slidefilms and \$115.00 for slide sets. You may subscribe to either format, or both, at the prices listed.

Transparencies – The advance order for transparencies includes one set of each packet of overhead projection transparencies released during the school year. Each packet includes transparencies printed on clear plastic, paper copies, and related text material, all in a manila pocket folder with the title stamped on the tab. The 1989-90 guaranteed maximum price for transparencies in Agriculture/Agribusiness is \$30.00 for Illinois subscribers, and \$35.00 for out-of-state subscribers. The 1989-90 guaranteed maximum price for transparencies in Horticulture is \$25.00 for Illinois subscribers, and \$30.00 for out-of-state subscribers.

Subject-Matter Units – An advance order set of subject-matter units includes one copy of every unit released during the school year. A number of sets may be ordered, often to match the number of students in a teacher's largest class. The 1989-90 guaranteed maximum cost for subject-matter units in Agriculture/Agribusiness is \$5.00 per set, and for Horticulture, \$3.00 per set.

NOTE:

Advance order materials are shipped throughout the school year as they are released. Charges are accumulated and billed at the end of the school year. Billing is for actual costs, at or below the guaranteed maximum, for each area: slidefilms, slide sets, transparencies, and sets of subject-matter units, (plus shipping). Other billing times may be arranged if requested.
